<b>Databases</b>	Microsoft SQL Server, MySQL.

## Work experience

---

1) Cybage Software Pvt. Ltd. | Pune | [www.cybage.com](http://www.cybage.com)

**Sr. Software Developer**

**Responsibilities in the projects:**

**Role: RPA Developer**

---

- Building capabilities on UiPath tool by exploring its newly introduced concepts/features & gain more working knowledge on the latest releases & providing best feasible solution to the Client for business process improvements.
- Worked with the Business Analysts & other stakeholders in identifying and defining the requirements.
- Analyze the feasibility of existing business process suitable for automation.
- Automated several business processes for various business systems using UiPath tool.
- Used UiPath Orchestrator for deployment, monitoring and management of UiPath Robot automation activity.
- Efficiently handled the monitoring and troubleshooting of studio environment through Orchestrator.

**Role: Automation/Manual QA**

- Involvement in test estimations.
- Analyze requirements and create / develop test cases based on those requirements and execution for the same.
- Involved in creation of automation scripts for Smoke & Sanity testing using Selenium with Java.
- Writing test cases, preparation of test data, defect tracking using MTM.
- Worked proactively to coordinate the issues with development team and regular follow up to get the issues resolved in timely manner without impacting the testing deadlines.
- Responsible for accurate reporting of test results and managing follow up activities including bug tracking, updating and fix verification.
- Mentoring and assisting onboarding team members with KT about the application to get know how of the project.
- Actively participated in the retrospective & grooming status meeting.

**1. Atos India Pvt Ltd | Pune | [www.atos.net](http://www.atos.net)**  
**Associate Test Engineer**

**Responsibilities in the project:**

---

- Majorly involved in Functional, Integration, Regression and End to End testing.
- Coordinating all testing activities required to test multiple applications.
- Writing test cases, preparation of test data, test case execution in HPQC.
- Preparing the test environment to execute the test cases by smoke testing.
- Involved in raising defects and updating the HPQC as per the test execution. Involved in Handover training imparted to the Production team.
- Compiling daily status reporting to the upper management. **Project experience**

**1. Project name: Specialized**  
**Client: Leading MNCs**  
**Domain: RPA**

**Project description:**

---

2. Specialized is a COE for getting well versed with RPA tools and technologies with the intent of automating business processes. Building capabilities with respect to different RPA tools & providing best feasible solution to the Client for business process improvements.
- 

Below listed are few uses cases that are worked upon:

**a. Billing and Advertising Report Upload**

3. **Background:** XYZ is an agency that works for ABC Company. They have their own custom tools to manage advertising reporting & billing, but ultimately, they need to upload their reporting information to central digital media billing system. This project aims to automate this upload process.
  4. Project Goal: Populate actualized delivery data into central digital billing system based on ABC's compliance process so that vendors are paid appropriately.
  5. • Client Success: Maintain current standards (efficiency and effectiveness) and move towards pushing data in shorter time (first week vs. third week). Client needs to manage billing in second week of month.
  6. • Agency Success: Increase speed/efficiency with same/less resources, and re-invest human attention in better work.
-

## b. Invoice Email Support

**Background:** Due to working from home, our Finance Associates (FA) are having trouble extracting and printing their vendor invoices. Each FA processes certain vendors for one or more Agencies. So multiple FAs need to access Billing Inboxes, leading to issues with 'marking as read' or moving/deleting important emails.

**Project Goal:** Extract and arrange invoice PDFs from inbound emails in Billing Inboxes so that FAs can print and process invoices safely and easily. No automated data extraction is required at this stage.

## c. Generate Yearly Report

**Background:** Download all the monthly reports for a specific vendor and generate a yearly report. The objective of this process automation is linked to the project business case and is mainly intended to:

- Deliver faster processing
- Reduce redundant activities
- Improve overall performance and reliability

## d. Calculate Client Security Hash

**Background:** Generate the Security Hash for each Client based on their personal information. The objective of this process automation is linked to the project business case and is mainly intended to:

- Deliver faster processing
- Reduce redundant activities
- Improve overall performance and reliability

## Roles and responsibilities:

- Participation in the client call for understanding the business process with other stakeholders & finalizing the best feasible solution for its process automation.
- Analyze requirements by referring to the Process design document shared & build the process automation for the given use cases.
- Participating in Weekly status call meeting to update the progress & query resolution regarding the process requirement if any.
- Implemented selectors for interacting with window and web browsers for continuous navigation of applications.
- Used Action Center feature wherein human input is required by the bots to progress on the execution of the process.
- Used Screen Scraping method to extract text from application by appropriate output methods such as Native, FullText and OCR.
- Used Data Scraping method for extracting structured data from browser applications or documents into a CSV file or Excel Spread sheet
- Used image activities with wait conditions to ensure proper website or application loading, to perform certain actions in a loop.
- Interacted with the different send services of mail to send automatic mails and audit logs regarding the task completion.
- Used Excel automation for repetitive Excel data entry, appending and for comparing columns.
- Worked on PDF automation i.e. extraction of data from single or multiple PDF files.
- Configuring the Bots and deploying processes and schedule the jobs in UiPath Orchestrator.

- Used Queues to collect information from orchestrator to perform additional tasks.
- Handled the Execution of project in UiPath Robot.

## 2. Project name: LAKANA

**Client:** LAKANA (Nexstar Digital LLC)

**Domain:** Media & Entertainment

**Project description:**

LAKANA provides a Content Management Platform to various brands in Media and Entertainment Industry. Some of the big brands like Fox TV, Nexstar Digital etc. are clients of LAKANA. With Liferay as its Content Management System, LAKANA provides various services to create attractive content, faster data with Accelerated Mobile Pages (AMP) Framework & Digital Acceleration (DAC) and location or time-based Ads from Taboola to achieve desired revenue generation.

**Roles and responsibilities:**

- Analyze requirements and create / develop test cases based on those requirements and execution for the same.
- Worked on creation of scripts for Sanity Testing.
- Participating in Grooming meeting along with development team for discussion of sprint tickets.
- Compiling weekly status reporting to the upper management.
- Involvement in test estimations.
- Mentoring new team members to get the know-how of the project.

## 3. Project name: FRHI

**Client:** FRHI Brand Sites & Loyalty Day One

**Domain:** Travel & Hospitality

**Project description:**

FRHI Hotels and Resorts is a Toronto based Hotel Management Company, formed in January 2006. Fairmont, Raffles and Swissotel have combined efforts to offer a greater selection of extraordinary global destinations. Three distinct brands, Fairmont, Raffles and Swissotel, have combined to provide the world's finest accommodations for discerning travelers - giving customers easier access to more destinations. Elegant accommodations and impeccable service in the world's finest destinations are elements that all the brands share. However, these three brands also maintain their identities and traditions: Fairmont as a landmark presence integrated into its community; Raffles as sophisticated luxury with residential charm; and Swissotel as personalized efficient service within a contemporary ambiance.

**Roles and responsibilities:**

- The scope of this project consists of testing issues logged by the Marketing Team of FRHI, that are reported/faced by the customers along with the change request or enhancement of the Brand sites if any, are passed to the Cybage team for fixes.
- Analyze requirements and create / develop test cases based on those requirements and execution for the same.
- Participating in Requirements Design phase with the client along with development team.
- Compiling weekly status reporting to the upper management.

- Involvement in test estimations.
- Involved in creation of automation scripts for Smoke & Sanity testing using Selenium with Java.
- Writing test cases, preparation of test data, defect tracking using MTM.

#### **4. Project name: E-Plus**

**Client:** E-Plus

**Domain:** CRM Telecom

**Project description:**

E-Plus is a mobile telecommunications operator in Germany. E-Plus is the third largest mobile operator in Germany, after T-Mobile (38 million subscribers) and Vodafone (37 million subscribers).

#### **Roles and responsibilities:**
